ProWick™

The ProWick Post-Operative Dressing System is designed to meet the demands of Lipoplasty techniques.

ProWick features a triple-layer design composed of state-of-the-art, super-absorbent material that quickly wicks patient exudate away from incision sites and into a low-profile, leak resistant Cover Dressing (fluid reservoir).

14” x 18” Cover Dressing (shown)

PROWICK DRESSING SYSTEM

- **HYDROPHILIC FOAM ISLANDS**
- **SUPER-ABSORBENT COVER DRESSING**
- **COMPRESSION PAD (optional)**

The Surgeon’s Finishing Touch

ProWick™

A Comprehensive Approach to Post-Operative Wound Care

4” x 6” Cover Dressing

PROWICK’S KEY ADVANTAGES

Super-Absorbent Wicking: Hydrophilic Foam Islands wick fluid away from incision sites into the super-absorbent Cover Dressing (fluid reservoir).

Fluid Reservoir: 14”x18” Cover Dressing absorbs up to 32 ounces and remains dry to the touch.

Ultra-Low Profile: Thin, uniform design reduces bulk and facilitates even compression.

PROWICK LIPO DRESSING SYSTEM

Foam Islands:

- Hydrophilic material actively wicks exudate away from incision sites, minimizing pooling

Super-Absorbent Cover Dressing:

- Triple layer, leak resistant dressing stores exudate away from incision sites
- Ultra-low profile enables uniform compression

Compression Pad (optional):

- Rests between cover dressing and compression garment and enables enhanced compression

Foam Islands

Super-Absorbent Cover Dressing

PRODUCT INFORMATION

MODEL #	DESCRIPTION
PWL-10	4”x 6” Cover Dressing and 2 Foam Islands
PWL-20	10”x 10” Cover Dressing and 12 Foam Islands
PWL-30	14”x 18 Cover Dressing and 12 Foam Islands
PWL-10C	4” x 6” Cover Dressing, 2 Foam Islands and Compression Pad
PWL-20C	10”x 10” Cover Dressing, 12 Foam Islands and Compression Pad
PWL-30C	14”x 18” Cover Dressing, 12 Foam Islands and Compression Pad
